Weighted aggregation example in figure 1:

$$\frac{0.25 * 3 + 0.5 * 3 + 0.5 * 3 + 0 * 1 + 0.25 * 1 + 0.25 * 1}{3 + 3 + 3 + 1 + 1 + 1} = 0.354$$

Proposal Philippe Usseglio-Polatera:

$$\frac{3 * (\frac{0.25 + 0.5 + 0.5}{3}) + 2 * (\frac{0 + 0.25}{2}) + 0.25 * 1}{3 + 2 + 1} = 0.291$$

Direct aggregation example in figure 1:

$$\frac{0.25 + 0.5 + 0.5 + 0 + 0.25 + 0.25}{6} = 0.291$$
